

AWS DevOps Engineer Intern Assignment Report

Name: Rohit Atole

Objective

Deploy a simple static HTML website on an AWS EC2 Ubuntu instance using Nginx and document the complete deployment process.

AWS Services Used

- Amazon EC2
- Security Groups

Linux Commands Used

```
sudo apt update
sudo apt upgrade -y
sudo apt install nginx -y
sudo systemctl status nginx
sudo systemctl restart nginx
df -h
free -h
top
ps -ef
```

Steps Performed

1. Created an Ubuntu EC2 instance.
2. Configured a Security Group to allow SSH (22) and HTTP (80).
3. Connected to the instance using SSH.
4. Updated packages and installed Nginx.
5. Replaced the default Nginx page with a custom HTML page.
6. Verified the website using the EC2 Public IP.
7. Uploaded the project files to GitHub.

Problems Faced

SSH permission issues, ensuring HTTP port 80 was open in the Security Group, and verifying the Nginx service status.

Learnings

Learned how to launch EC2 instances, configure Security Groups, connect through SSH, install and manage Nginx, host a static website, and use GitHub for version control.

Time Taken

Approximately 2 hours.
